PERSONAL PROJECTS

ROBO FRIENDS APP

- An interactive and responsive frontend app that pulls a list of profiles of robots from a JSON file and populates it on a webpage, each robot profiles can also be accessed via the search robots bar
- Built with Javascript and React
- This frontend task can be accessed in my Github repo

GOOGLE BOOKS API

- The goal of the task is to build a listing page for a list of books using the Google books API
- It was required not to use any front-end framework but HTML, CSS, and Vanilla JS to achieve this task
- This frontend task can be accessed in my Github repo

TIP CALCULATOR APP

- Designed and implemented a tip calculator app that calculates the correct tip and total cost of bills per person for a meal
- The project was achieved with HTML 5, SASS, and vanilla JS
- This frontend task can be accessed in my Github repo
